

Environmental Policy Statement

ANC is committed to carrying out its business in an environmentally responsible manner and effectively identifying and managing any risks which may potentially impact the environment.

To support this commitment, we will:

- Comply with relevant environmental laws, regulations, industry codes of practice and project requirements specified by regulators or clients
- Consider the environmental impact of business decisions
- Control the impact of our operations on the environment and community through effective planning and risk management methodologies
- Communicate pertinent environmental responsibilities and obligations to workers, consultants and sub-contractors and provide appropriate information and training
- Establish and maintain a program for the continual improvement of our environmental management system and environmental performance
- Seek to minimise pollution and use of natural resources by encouraging and practising economically viable waste reduction, emission control, energy conservation and recycling programs
- Review this policy statement in line with our document review policy and make it available to the public, clients, regulators and other interested parties upon request.

ANC will ensure that the leadership, support and resources needed are provided so that we can effectively manage environmental risks and continuously reduce our environmental impact.

All workers are required to cooperate with managers and supervisors to ensure that the objectives of this policy are met.

We aim to ensure we actively avoid activities which may have an adverse impact on the environment and encourage workers to report all environmental impacts including defective vehicles, spills of materials and wastes and any suspected or actual pollution.
